KONICA MINOLTA

bizhub C3850/C3350

COLOR SOLUTIONS

LOWER COST. TOUCHSCREEN CONVENIENCE.

COUNT ON KONICA MINOLTA

bizhub C3850/C3350:

COMPACT, HIGH-SPEED COLOR SOLUTIONS FOR NETWORK PRODUCTIVITY

With brilliant color print/copy output up to 40 pages per minute, Konica Minolta's bizhub C3850 and C3350 can capture and share data in digital or hard copy formats – at lower cost per page than conventional laser printers. Along with large color touchscreens and solution integration, you'll have features you'd expect to find only on full-size MFPs – built-in Emperon® print control, enhanced security functions, fax and finishing options, even direct printing of OOXML files in Word, Excel and PowerPoint.

More color power in compact design.

Every business wants it all: fast color output, space-saving design, solution integration and expandable functions that grow with your needs. The bizhub C3850 and C3350 answer the challenge – with more color power in minimum space, uncompromising color quality for high-impact communications, and special features that make them ideal for healthcare, educational and legal applications.

The bizhub C3850 delivers up to 40 ppm in both color and B&W (bizhub C3350: 35 ppm). High-quality 1200 dpi resolution makes all your communications come alive – reports, presentations, even marketing materials with photos, charts and complex graphics. And your cost per page will be lower than with stand-alone desktop laser printers, which are often under utilized and can sit for long periods in standby mode.

Even the look of these two bizhub models is a step ahead: sleek dark cabinet design and compact footprint incorporating the familiar INFO-Palette design. Large 7" color touchscreens are as easy as a familiar tablet, with quick touch-and-flick operation, logical and intuitive menus, user-friendly icons and the ability to customize screens with the functions you use most often.

To move information faster in branch and retail locations, small offices, home offices and a wide range of workplace environments, the bizhub C3850 and C3350 can provide advanced scan capture functionality right from the control panel. Client bill-back or account tracking is available with an advanced integrated platform – all to keep you on top of your workload and a step ahead of your competitors. And you'll have productivity features everyone can appreciate, including fast warm-up and first-copy output, Eco Mode for energy-saving operation, and Silent Mode for a quieter workplace.

Ideal for networked environments with large and small MFPs.

Why compromise with stand-alone laser printers that waste time and energy – and can't interface with your networked workflow? The bizhub C3850 and C3350 provide Open API for seamless software integration, plus UPD support for networkable convenience with mixed fleets of large and small MFPs and desktop printers.

In both bizhub models, the exclusive Konica Minolta Emperon® print system is built-in, with PCL and PostScript support. Powerful 1 GB memory and 320 GB hard disk drive provide on-board document storage, making reprints and updates quick and simple. And USB Direct Print lets you print documents directly from a USB device, including OOXML Word, Excel and PowerPoint files.

The power of PageScope for managing your bizhub.

PageScope Web Connection enables users or administrators to check operating status right from their local browser. PageScope Net Care Device Manager enables administrators to configure multiple bizhub units from a single point to simplify IT administration. While print jobs are in progress, PageScope Print Status Notifier provides automatic alerts to speed your workflow.

And there's more. PageScope Enterprise Suite version 3 enables you to securely authenticate users, provides secure print release anywhere on your network and allows you to restrict or limit access to specific functions. This powerful software incorporates the ability to import/export pre-defined templates, including commonly used network settings, eco-friendly settings, and automatic MFP registration and remote firmware updates that you can schedule during non-business hours.

Apps, solutions and i-Options to improve your productivity.

Another exclusive Konica Minolta advantage is downloadable apps to help you work faster and smarter. PageScope Mobile, a free app available for downloading at your Apple Store or Google Play Store, allows mobile users to print from tablets or smart phones to the bizhub C3850/C3350.

You can also integrate solutions to expand functionality and customize your bizhub C3850/C3350. The FormJet Prescription Secure from TypeHaus is just one example: a safe and cost-efficient solution for small medical offices to print prescriptions from plain paper, avoiding the expense of costly preprinted prescription pads. And Konica Minolta's i-Option kits can increase the power of your bizhub C3850/C3350 with specialized functions – such as the LK-106 for Bar Code Font support, the LK-107 for Unicode Font, the LK-108 for OCR Font, and the LK-111 for ThinPrint.

There's more: fax, enhanced security, even offline stapling.

You'll have increased productivity right out of the box with high-speed, high-quality Super G3 fax transmission/reception – standard on the bizhub C3850, optional for C3350. Both models incorporate security features you would expect to find only on large office MFPs, including compatibility with IC Card authentication devices*. And for finishing reports and presentations with ease, you can add a 20-sheet stapling option to the rear side of your bizhub C3850 or C3350.

Like all bizhub MFPs, these high-performance printer/copiers are backed by superior Konica Minolta service and support. And our Clean Planet program provides cost-free recycling for all Konica Minolta consumables, including toner cartridges, imaging units, waste toner bottles, developer units and drums. We provide free return cartons with prepaid UPS labels that make the recycling process easier than ever.
